AMUJURI HEMASAI

FULL STACK DEVELOPER

hemasaiamujuri3@gmail.com 6300228591 LinkedIn Github

PROFILE

Full Stack Developer with 2 years of experience building scalable web applications using **React.js, Node.js, Express.js, MongoDB, and MySQL**. Skilled in developing RESTful APIs, responsive **user interfaces**, and optimizing backend performance. Experienced with AWS fundamentals, Docker, and modern development tools with a focus on clean and scalable code. Familiar with integrating AI capabilities into real-world applications using **OpenAI APIs,** enabling intelligent features like chatbots and automated insights.

PROFESSIONAL EXPERIENCE

Full Stack Developer June 2025 –
Ispace Software Solutions April 2026
Hyderabad

Software Developer January 2024 –
Spotmies May 2025
Visakhapatnam

PROJECTS

REAIDY.IO
Role: Software Developer
Tech Stack: JavaScript, React.js, Node.js, Express.js, MongoDB
Key Contributions:
- Designed responsive front-end components using React.js and built scalable RESTful APIs using Node.js and Express.js to support high-performance web applications.
- Implemented **Role-Based Access Control (RBAC)** authorization to manage user permissions and restrict access to application resources based on user roles.
- Integrated **OpenAI API** to evaluate candidate assessment responses and automatically generate scores and feedback.
- Developed **AI-driven recommendation system** to provide improvement suggestions for candidates after completing assessments.
- Implemented backend workflows to process assessment data and send it to AI models for automated evaluation.
- Optimized backend performance to support large-scale candidate assessment processing.

Kornferry
Role: Full Stack Developer
Tech Stack: JavaScript, React.js, Node.js, Express.js, MySQL
Key Contributions:
- Developed frontend features using React.js and backend APIs using Node.js and Express.js.
- Implemented logic to analyze user assessment results and generate recommendations for skill development.
- Diagnosed and resolved real-time production issues by debugging backend APIs, optimizing database queries, and improving system reliability to ensure smooth application performance.
- Integrated backend workflows to support AI-driven talent evaluation and recommendation features.
- Implemented backend logic to process assessment responses and structure data for AI-based analysis and recommendation generation.

TECHNICAL SKILLS

Front-End Technologies: JavaScript, TypeScript, React.js, Redux, HTML, CSS, Tailwind CSS, Material UI
Back-End Technologies: Node.js, Express.js
Databases: MongoDB, MySQL, Redis
Cloud: AWS - EC2, S3, IAM, Lambda, DynamoDB, RDS
Data Structures & Algorithms: Strings, Arrays, Linked Lists, Stacks, Queues, HashMaps, Recursion, Searching and Sorting Algorithms.
System Design: System Architecture, Database Sharding, Vertical Scaling, Horizontal Scaling, Caching, WebSockets, Rate Limiting
DevOps & Version Control: Git, GitHub, Docker, basic CI/CD concepts
Tools: VS Code, Postman, Swagger (OpenAPI), MongoDB Compass, MySQL Workbench, Chrome DevTools
AI Tools: Cursor AI, GitHub Copilot, OpenAI API, Claude, Bolt, Lovable

ROLES AND RESPONSIBILITIES

- Implemented authentication and authorization (JWT-based) in a real-time application, improving security and access control.
- Integrated Google OAuth-based login to enable secure social authentication and seamless user sign-in experience.
- Designed and optimized databases using MongoDB and MySQL to support scalable and efficient data storage.
- Optimized backend APIs and database queries, reducing response time from ~2 minutes to ~30 seconds and improving system performance.
- Built a caching layer using Redis to optimize frequently accessed APIs, reducing response time by 40% and improving overall system performance.
- Integrated Razorpay payment gateway in both front-end and back-end to enable secure online transactions, including order creation, payment verification, and signature validation.
- Validated and documented APIs using Postman and Swagger, ensuring reliability and clear API documentation for front-end integration.
- Deployed applications on Railway and Vercel, and gained familiarity with AWS cloud services for hosting, storage, and basic cloud operations.
- Managed version control and collaborated with team members using Git and GitHub to handle code changes, branching, and versioning.
- Worked with Docker for containerizing applications and familiarity with CI/CD pipeline concepts for automated build and deployment workflows.
- Worked in Agile development environments, collaborating with team members during sprint cycles to deliver features and bug fixes.
- Worked on applications built with Microservices architecture, implementing APIs and integrating services.

EDUCATION

B-Tech - Computer Science And Engineering — June 2020 – April 2024
Baba Institute Of Technology And Sciences — Visakhapatnam
Percentage: 70%

Intermediate — June 2018 – March 2020
M.J.P.A.P.B.C. Welfare Residential Educational Institute — Visakhapatnam
Grade: 9.59

SSC — June 2017 – May 2018
M.J.P.A.P.B.C. Welfare Residential Educational Institute — Visakhapatnam
Grade: 9.7
